MADE IN GERMANY
HIGH
QUALITY
MADE IN GERMANY

Glassmaker at work

1889

The art of glass production and refinement has flourished in Lusatia, Germany, for more than 570 years. It all began with the careful selection of a region renowned for its high-quality raw materials such as sand, wood and limestone. This enabled the development of a thriving glass industry, leading to the establishment of an worldwide unique concentration of 67 glassworks dedicated to hollow glass production around 1900. Today, Stölzle Lausitz is the only remaining glassworks in Lusatia.

Our journey began in 1889 in Weißwasser with the founding of the Oberlausitzer Glaswerke by J. Schweig. 135 years later, Stölzle Lausitz is one of the world's leading manufacturers of high-quality drinking glasses made of lead-free crystal (crystalline) glass. We combine the rich tradition of glassmaking with state-of-the-art technology and a keen sense for the high demands and individual wishes of our customers.

Glasses are our passion. They enhance each moment for a lifetime.

BORN IN FIRE

Stölzle Lausitz has been keeping the artistic tradition of glass production alive since 1889 by passing on and perfecting the techniques from mouth-blown to modern machine production from generation to generation.

In the 1960s, a new era began with the first machine-made glasses. Since then, our success story has continued. Our talented glassmakers devote themselves to these techniques with dedication and passion every day, continuously refining the aesthetics, from classic to cutting-edge shapes. More than 45 million glasses are produced every year with the highest quality, durability and attention to detail in mind - from crystal-clear wine glasses to elegant tumblers.

From the idea to production - it fulfils us with pride to see our Stölzle Lausitz glasses on the tables of this world. A long-lasting journey that has continued for more than a century and lives on in every single glass.

From the idea to production

OUR ECOLOGICAL RESPONSIBILITY

Responsible behaviour and careful use of resources - these are the keys to our future. Therefore, we attach great importance to minimising our impact on the environment, from the extraction of raw materials to production and delivery.

Most of our products are manufactured in our own factory in Weißwasser and are therefore "MADE IN GERMANY". Most of the raw materials required for this come from the Lusatian region, which keeps transport routes short and reduces our CO² footprint. When purchasing machines, materials and packaging, we prefer to work with regional suppliers to ensure a sustainable environmental footprint.

Our glasses are 100% lead-free and free from harmful substances, which not only ensures that they can be recycled, but also enables us to recycle 100% of our own shards. In addition, our packaging is FSC-certified (Forest Stewardship Council) and the filling material and pallets are made of recyclable material.

As an active participant in the EU Emission Trading Scheme, we use

state-of-the-art technologies to continuously reduce our greenhouse gas emissions, for example by renewing our filter system. With DIN EN ISO 50001, we introduced an energy management system to further increase energy efficiency by establishing adequate systems and processes. All glass that does not meet our quality standards is fully recycled, and we have significantly reduced our gas consumption and CO² emissions by using electric boosting in our furnaces. At the same time, we have increased our efficiency. The water cooling system in production is carried out using collected rainwater, which avoids the use of drinking water. Waste heat from production is used to heat all buildings and the water in the social area, without the need for additional energy sources.

We are particularly proud to have received our first DIN EN ISO 9001 certification for quality management systems in 2023 to further promote efficiency, effectiveness and customer satisfaction.

Sheer rim

Beautiful sound

Thin-walled

Pulled stem

Solid bottom plate

STÖLZLE LAUSITZ GLASSES

The trademark of Stölzle Lausitz are stem glasses with a stem pulled to the highest perfection. In this manufacturing process, the stem is pulled out of the goblet and melted together with the bottom plate. This creates glasses that appeal like mouth-blown and have no seam lines or tangible transitions. At the same time, these glasses are particularly shatterproof.

- Environmentally friendly produced in Germany, in the Lusatian region
- 100% lead-free crystal glass (crystalline)
- 13% lead substitute in our glass batch as quality commitment. This makes our glasses higher quality, more brilliant, softer, more flexible and more durable - compared to the usual 8-10% in the industry
- High break resistance, especially glasses with pulled or fire-polished stem
- Certified dishwasher-safe

Design Awards

NEW PACKAGING CONCEPT

Our new corporate identity is not a new departure but rather a refresh of the classic. Rooted in the familiar colours that have been an integral part of our identity, this transformation breathes new life into our brand. As the product takes centre stage, the packaging design is also re-vamped. We created a new concept for a broader

audience, appealing to the HoReCa but especially also suitable for Retail and E-commerce. It represents a new and modern glow as well as a more design driven approach. With the relaunch of the packaging, we are setting the next milestone in the company's 135-year history.

Retail Box Design

This is designed for 4- and 6-piece sets and applicable across all series. The box utilizes an automatic carton sets with a top-opening mechanism and is targeted for retail, loyalty programs, supermarkets, etc.

Premium Box Design

This design is suitable for two SKUs and features a front-opening mechanism for a nice unboxing experience. It is targeted at high-end/premium offline and online retail channels.

*Available for Handmade, Prestige, and part of the Premium series. Additional series on request.
*Erhältlich für Handmade, Prestige und teilweise Premium. Weitere Serien auf Anfrage.

COCOON

Release the Flavour

Through innovative shaping methods we created a butterfly cocoon-inspired shape that not only provides ample space for your wine but also allows the concept of "aroma development" to take on entirely new facets. The "powerbox" enables optimal aeration of your wine, enhancing its aromatic profile even with a gentle swirl. The longer you leave your wine in the Cocoon, the more its flavour undergoes a metamorphosis.

The emphasis on the sensory properties of the glass has given rise to a distinctive contemporary design that stands apart from traditional wine glasses. The sleek design, coupled with its lightweight construction, thin stem, and thin walls, reflects the precision and innovation dedicated to its development. Glasses that appeal like mouthblown.

 FINO
Featherlight

FINO enchants with its exceptional delicacy: featuring ultra-thin walls, an elegantly drawn stem, and a feather-light flat foot disc. FINO stands as our lightest machine-made glass series, challenging the boundaries of sophistication. Traditionally, such refinement was reserved for the most elegant mouth-blown crystal wine glasses. However through cutting-edge product development and new manufacturing techniques at Stölzle

Lausitz, we've brought this level of sophistication to machine production. The FINO collection offers everything a wine lover needs: flavor and taste development at the highest level, stability, exceptional feel in the hand and durability. Functionality is guaranteed, but the true emphasis here is on the quality of the glass. The series is characterized by its lightweight and simple elegance.

STARLIGHT

The Lively Lightness

STARlight offers a new dimension: machine glass that blurs the line to mouth-blown glass. STARlight alongside Cocoon and Fino are the thinnest and most lightweight collections in our portfolio. STARlight, the glass series with the balanced form and simultaneously high functionality, is the result of years of develop-

ment work in the field of machine-made glass. The result: The stem has a diameter that is about ten percent smaller than that of conventional machine-made glasses and the goblet also has a noticeably thinner wall thickness. In this way the STARlight series combines lightness with extraordinary elegance.

QUATROPHIL

Perfect Indulgence

The QUATROPHIL series offers exceptional glasses: Their shape ensures the maximum flavor of the wine. The particularly high, filigree stem and the cubic shape are the distinctive features of this glass series. And the accentuated deep scheduled widest point of the goblet gives the glasses a special expressiveness.

With QUATROPHIL, Stölzle Lausitz documents its high level of competence in the production of extravagant machine glass without sacrificing the robustness, elegance and functionality of the glasses.

POWER

A Powerful Appearance

POWER is characterized by its puristic, expressive form. The glasses give the wine even with small amounts a maximum breathing surface. The distinctive goblet is carried by a slightly waisted stem, which also dives seamlessly into the goblet as well as into the bottom plate. This gives the overall appearance an astonishing lightness while underlining the straightforward design.

EXPERIENCE

A Special Experience

The basis of the glass series was developed together with sommeliers for different Riesling wines. Design and functionality proved to be so excellent that many people didn't want to waive the special experience with other types of wine – EXPERIENCE was born.

The stem glasses impress with their stylish shape combined with a high wine performance. The combination of sweeping curves and clear tapering contributes to outstanding wine sensory properties and optimum wine enjoyment.

EXQUISIT

Timeless Elegance

A finely tuned organic design, elegant proportions and a rich and full sound when toasted – these are the advantages of EXQUISIT. Their classic design, perfectly optimised for wines, makes them suitable for any setting and a wide variety of occasions.

The EXQUISIT series crowns the elegance of the balanced design: It lifts the glasses out of the ordinary and lends them noblesse. Nevertheless, each glass is functional and down-to-earth, paired with a royal touch.

Wine Bar George

“Our universal Stölzle glasses from the Exquisit collection are the perfect shape for all purpose tasting. Whether a guest orders red wine or white wine, a single ounce or a full glass, the all-purpose glass is best for their enjoyment. The glass is traditional in shape yet boasts a classic simplicity. They are also incredibly durable in a restaurant setting while still having a sheer rim.

We were recently awarded the best wine bar list in the world by the World of Fine Wine, and we know that using Stölzle glasses contributed to our success. The all-purpose glass is the perfect choice for any bar or restaurant.”

George Miliotes, Master Sommelier and Owner of Wine Bar George

"We were recently awarded the best wine bar list in the world"

About Master Sommelier, George Miliotes

As one of 273 Master Sommeliers in the world, George Miliotes is a passionate educator and curator of wines. A firm believer in education and knowledge-sharing, Miliotes continuously studies wine, identifying the most interesting wines through annual trips to wine-growing regions from France to South Africa. Building relationships with some of the best vintners in the world, he also takes an active role in the winemaking process helping to create custom blends.

Miliotes' unique by-the-glass lists encourage guests to make adventurous choices, selecting new wines, whether they are domestic or global, to pair with their courses. The result of his worldwide efforts are wine lists that are distinct to his restaurant's culinary offerings, and widely reviewed as exceptional in every way.

George Miliotes is the grandson of Greek immigrants and a child of the restaurant and hospitality business. His family owned a specialty market and café in Orlando, Fla., which became a gathering spot for local chefs and served as the starting point for Miliotes' passion for food and wine.

Miliotes later became the general manager of California Grill at Walt Disney World Resort, where he not only created an award-winning wine list, but also one of the first lists in the country to offer 100 wines by the glass. He is widely regarded as one of the restaurant business' foremost wine experts.

In March 2007, Miliotes became a Master Sommelier, passing a series of rigorous examinations that requires the candidate to identify grape variety, country of origin, district of origin and vintage of wines by taste, sight and aroma alone. From 2002 – 2016, he oversaw all aspects of wine culture for Darden including The Capital Grille and Eddie V's, and was one of the founders of Seasons 52. George led the development of their award-winning wine lists and educated and motivated service teams about wine in order to deliver exceptional guest experiences.

Miliotes returned to Walt Disney World with the opening of Wine Bar George, the only wine bar in Florida led by a Master Sommelier. Now open in The Landing at Disney Springs, Wine Bar George brings Miliotes' expertise and worldwide travels to the heart of Central Florida.

REVOLUTION

Distinctive Optimisation

REVOLUTION was designed by star architect Prof. Wilhelm Holzbauer and wine expert Heinz Kammerer. The idea: The requirements for the glass are determined less by the individual grape variety, but rather by factors such as acidity, ripeness, tannin, viscosity and aroma of the wine.

In this way, a concentrated selection of glasses was created that is convincing in its suitability for beverages and its design language. This means that with a manageable number of glasses, you are equipped for every purpose.

WEINLAND

Traditionally Good

WEINLAND was one of the first ranges which were produced and sold under the brand Stölzle Lausitz. At the same time, WEINLAND has lost none of its topicality and universal applicability.

The timeless design with an all-round character and an excellent finishing are the pluses for the range. Both ensure robust and well-balanced glasses. A short stem and a stable foot guarantee optimal handling as well as a high break resistant. WEINLAND offers a large selection of glasses and tumblers for every use.

ULTRA

Short and good

The stems of the ULTRA goblets were intentionally reduced in order to achieve a better handling. It is much easier to clean the glasses in dishwashers and to carry them on a tray though the low balance point.

The storage is also more unproblematic.

By maintaining the size of the goblets, the ULTRA glasses preserve the highest level of functionality and drinking enjoyment.

KYOTO

The Next Generation

Mixology is an artful and innovative approach to crafting cocktails that goes beyond traditional bartending. It emphasizes creativity, precision, and a deep understanding of ingredients to create unique and often avant-garde drink experiences. Mixologists, akin to culinary artists, carefully balance flavors, textures, and presentation to elevate the cocktail-drinking experience. The Kyoto Barware embodies the principles of this craft seamlessly.

Inspired by Japanese design sensibilities, known for their precision, minimalism, and aesthetic sophistication, the Kyoto Barware aligns with the creative and meticulous nature of mixology.

The use of ultra-thin glass in the Kyoto Barware not only contributes to its distinctive appearance but also provides a canvas for mixologists to showcase their crafted concoctions. This allows the vibrant colors and intricate details of the drinks to shine through. The lightweight and elegant design of the Kyoto Barware adds an extra layer of sophistication to the mixologist's toolkit, enhancing the overall presentation and drinking experience for both the creator and the consumer.

Whisky Tumbler

NEW YORK BAR

Like in the 20's

These glass series beautifully merge the elegance of the past with a modern twist. Paying tribute to the iconic barware of the 1920s, an era renowned for its unique style and sophistication, these collections capture the essence of that bygone era.

Utilizing diamond-cut technology, debossed lines adorn these three bar collections, providing a nostalgic touch that harks back to the charm of the past. Classic yet distinctly modern, the glasses stand out as an exquisite eye-catcher.

TASTING SETS

Experience the art of whisky tasting

The four sets include a curated selection of different tasting glasses, each designed to highlight the complex flavours and aromas of whisky and other spirits. Each set contains four identical glasses of one specific shape, providing versatility for different tasting experiences. The sets are ideal for professional tastings, training sessions, or as part of a glassware range.

Designed for durability and functionality, these glasses are suitable for both commercial and private use. Available as 2- or 4 pk boxes.

BEER GLASSES

The Right Glass for Every Beer Fan

Good beer is a sophisticated drink, not least when it comes to the glass. That's why a wide range of glass shapes has developed within beer culture, each with its own functionality and – of course – its own fans. With its wide range of beer glasses, Stölzle Lausitz always offers the right glass for consuming "normal" or non-alcoholic beer and trendy drinks such as craft beer, ice beer and mixed beer drinks in style and with an appealing feel.

DECANTER

Why Decanting?

Older wines, especially red wines, from sediment in the bottle, the so-called depot. The decantation has the function to separate the wine from the unwanted depot and the tartar. It also enables the bouquet to unfold fully.

The shape of the decanter and their opening upwards influence the result of the decantation. The larger the surface of the vessel, the oxygen exchange within the decanter. A large opening increases the exchange of oxygen – a narrow opening allows the oxygen to float above the wine.
